STUMPAGE AND LOG PRICES IN CALIFORNIA

Preliminary Statistics for 1941

For several years the Forest Service, with the cooperation of the Bureau of the Census, has been collecting stumpage and log prices for use in studying the trend of values in the several timber producing regions. The information so obtained has been published on an annual basis, since 1929, in a series of statistical bulletins of the U. S. Department of Agriculture.

To comply promptly with requests for such information, the following tables of average 1941 stumpage and log prices for California have been prepared. They give average prices by species and type of sale as indicated by reports received to date from operating concerns and follow the statistical set-up in the printed bulletins. The data are preliminary and are subject to correction as additional reports may be received.

Additional copies of this release may be obtained upon request.
